

VDL

Flexible connectors for roof fans

Use

- Absorbing vibration from the fan to the air duct.
- Partial thermal distortion compensation in the air ductworks.
- For mounting with the **Tower-H**, **Tower-V**, **Tower-H EC**, **Tower-V EC** roof fans.

Design

- Consists of two flanges interconnected with a vibration-absorbing material.
- The flanges made of galvanized steel.
- The connecting vibration-isolating material is made of nylon reinforced polyethylene fabric.

Mounting

- The end flanges of the flexible connector are fixed to the mating flanges of the air duct or fan (**FDL** counterflange) or to the backdraft damper through galvanized bolts and clamps.

Overall dimensions [mm]
