VENTO ECO STANDARD
VENTO ECO COMFORT

Heat recovery single-room units

BLAUBERG
Ventilatoren

CONTENTS

VENTO ECO STANDARD

Features

- Arrangement of efficient energy-saving supply and exhaust single-room ventilation in flats, houses, cottages, social and commercial premises.
- Air purification with optional F7 filter PM2.5 > 99 %.
- Protection from outdoor noise.
- Reducing heat losses caused by ventilation due to heat recovery.
- Humidity balance and regulated air exchange create individually controlled microclimate.

Air flow:
up to 50 m³/h
14 l/s

Heat recovery efficiency:
up to 92 %

Power: from 1.00 W
**SFP:** from 0.48 W/l/s

Noise level:
from 12 dBA

EC motor

ErP 2016

ErP 2018

Design

- Internal decorative panel with manually actuated shutter
- Outer hood
- Ceramic energy accumulator (regenerator)
- Reversible fan with EC motor
- Air duct
- Noise insulating layer
- G3 filter
- F7 Filter (Option)

VENTO ECO STANDARD

Heat and humidity regeneration

UNIT OPERATING LOGIC IN WINTER PERIOD

Phase 1 (70 seconds)
Air extraction from the room

OUTSIDE   INDOOR

+20 °C

-7 °C

Phase 2 (70 seconds)
Air supply to the room

+17 °C   OUTSIDE

-10 °C

- Warm stale air is extracted from the premise, flows through the ceramic regenerator and transfers its heat energy and moisture to it.
- As the ceramic regenerator gets warmed up, the unit switches to the supply mode.

- Clean cold intake air flows through the regenerator and absorbs accumulated heat and humidity.
- When the ceramic regenerator is cooled down, the unit switches to the extract air mode.

Control

- Control of the unit operation mode is performed by means of the sensor control panel.

Heat regeneration mode

"Party" mode: max speed for 4 hours

Speed 3

Filter maintenance indication

Speed 2

Ventilation mode

Speed 1

Alarm indication

"Night" mode: min speed for 8 hours

- One control panel with sensor buttons can control up to two units.
- Low voltage (12 V) power supply between control panel and **Vento Eco** units.

~ 100–240 V

VENTO ECO STANDARD

Mounting

- The unit is designed for through-the-wall installation inside a prepared hole in an outer wall of the building.

- One unit is able to ventilate a room up to 25 m². For bigger rooms two or more units must be installed.

EXTERNAL CONTROLLERS

The group control system for wall-mounted Vento Eco Standard or Comfort is based on the CT1 controller and allows you to connect them to a single system using RS-485

THE SYSTEM INCLUDES:
- **CT1 Vento Eco** unit group controller
- Touchscreen **KV1 Vento Eco** control panel
- Central touchscreen **KV2 Vento Eco** control panel
- Power supply unit 220 V AC/24 V DC **PS 220/24-20**
- A single RS-485-based network can simultaneously support up to 32 devices, including up to 16 controllers, up to 4 KV1 Vento Eco control panels, and 1 KV2 Vento Eco control panel.
- A **CT1** controller is the core of the system. It enables power supply, setting up and controlling up to 6 ventilators, and is compatible with one humidity or CO_2 sensor.
- The unit group control is implemented via **KV1** wired wall-mounted control panel, and the power supply is ensured via a 220/24 V transformer.

- The **KV1** control panel is made out of high-quality white plastic, is equipped with a light indicator of operating status of the group of heat exchangers, and is installed into a standard socket receptacle.
- The **KV2** central control panel can combine and perform centralized control of up to 4 groups of **CT1** controllers. The **KV2** panel has a touch screen, a built-in temperature sensor, weekly timer for each of the 4 controllers and other user settings.

EXTERNAL CONTROLLERS

RS-485

RH/CO$_2$

CT1 VENTO ECO

Features

○ Power supply and group control of up to 6 Vento Eco units via RS-485 wired connection up to 20 m long.
Application

○ The controller is designed to operate the following control devices:
  - KV1 Vento Eco control panel;
  - KV2 Vento Eco central control panel;
  - PS 220/24-20 power supply unit.
○ The CT1 Vento Eco controller allows to:
  - set up the speed for a corresponding Vento Eco modification;
  - connect an optional wired sensor (NO) RH, CO_2 or others;
  - set up the corresponding zone addressing using a DIP-switch.

Installation

○ The controller is installed indoors in standard electrical round mounting boxes. The choice of configuration and connection of Vento Eco devices, as well as control panels KV1, KV2, is performed according to the CT1 Vento Eco controller manual.

Installation options
Technical data

Parameters	CT1 Vento Eco
Voltage DC [V]	24 ± 10 %
Maximum total current (with 6 ventilators) for 24 VDC [A]	1.25
Ambient temperature [°C]	+10…+45
Ambient humidity range [%]	10−80 (no cond.)
Weight [kg]	0.06
IP rating	IP20

Dimensions [mm]
KV1 VENTO ECO

Features

- The wall-mounted sensor control panel is designed to be used as a part of the control system for domestic decentralized air handling units of the Vento Eco series

Design

- The casing is made of high-quality plastic.
- The responsive touch panel is made of glass and features six control buttons, LED indicators for easy monitoring of the operating mode and a built-in humidity sensor.
- The set speed is displayed on the LED indicator.
- Designed to work with the CT1 controller..

Installation and connection

- It is isntalled on a wall indoors in a box for flush installation. The connection of the control panel is performed according to the unit user's manual.

Technical data

Parameters	KV1 Vento Eco
Voltage DC [V]	12–32
Current per 24 V DC [A]	0.1
Ambient temperature [°C]	+10…+45
Ambient humidity range [%]	10–80 (no cond.)
Weight [kg]	0.06
IP rating	IP20

Dimensions [mm]
KV2 VENTO ECO

Features

o The KV2 central control panel with a touch screen is used to control domestic reversible ventilators with energy recovery of the Vento Eco series.

Functions

o Central control of up to 4 groups of Vento Eco units. Each group can simultaneously include up to 6 devices.
o 7 languages available (English, German, French, Danish, Polish, Ukrainian, Russian)
o Individual control of each group of devices.
o Speed switching is individual for each group of Vento Eco devices
o User mode switching.
o Built-in temperature sensor.
o Weekly schedule operation settings are individual for each zone.
o "Sleep" timer.
o "Party" timer.
o Current time.
o Controls the indoor air temperature.
o Filter replacement indicator (timer-based).

Installation

o The connection and installation of the control panel are performed according to the unit user's manual.

Technical data

Parameters	KV2 Vento Eco
Voltage DC [V]	12–32
Current per 24 V DC [A]	0.1
Power cord type (10 m)	4 x 0.25 mm²
Temperature range [°C]	+10...+45
Humidity range [%]	10–80 % (no condensation)
IP rating	IP20

Dimensions [mm]

PS 220/24-20

Features

○ PS 220/24-20 is a fully airtight AC/DC power supply unit designed for domestic and industrial application as part of the group control system of Vento Eco series devices based on the CT1 controller and control panels KV1 and KV2.

Design

○ The transformer is supplied in a compact dustproof and water-proof casing with an IP68 IP rating. It meets the requirements of IEC/EN 62368-1, IEC/EN 60335-1 and IEC/EN 60601-1 (3rd edition) and is 2xMORR certified.
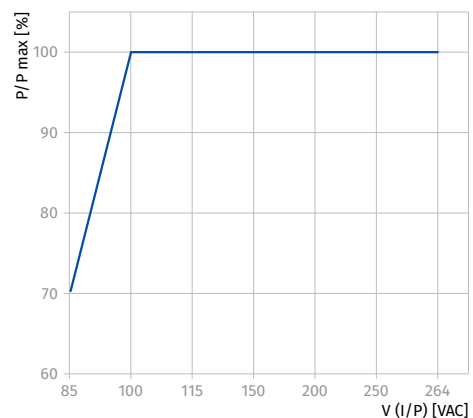

Installation

○ The transformer is designed for indoor installation. The transformers must be installed outside of zones of high humidity and temperature. Flush installation over suspended ceiling or in a wall niche is possible.

○ PS 220/24-20 is an in-built power supply unit. It is installed in sockets on walls. Connection via loose wiring. Fire safety requirements must be met when installing and operating the unit. Do not install transformers over heating devices.

Technical data

Parameters	PS 220/24-20
Power [W]	24
Voltage AC [V]	85...264
Rated input current [A]	0.5−0.25
Input frequency [Hz]	47−63
Inrush current 115/230 V AC [A]	25/50
Input voltage DC [V]	24
Output current [A]	1
Circuit breaker rating / Characteristic	6−16 A / B or C
Power factor [λ]	0.47
Output power derating – Temperature	2 % / V below 100 V AC
Output power derating – Input voltage	2 % / K above 50 °C
Means of protection	2 x MOPP
Leakage current (max) [μA]	100
Touch current (max) [μA]	100
Network configuration	TN-S, TN-C, TT, IT
No. of outputs	1
Efficiency ratio [%]	89
Maximum casing temperature [°C]	95
Operating temperature [°C]	20...80
Storage temperature [°C]	40...90
Maximum altitude	5000 m / 50−106 kPa
External dimensions [mm]	53×51×24.5
IP rating	IP68

Dimensions [mm]

MKV-6. ROUND MOUNTING BOX

Recessed box for use in masonry with an installation depth of at least 66 mm.
- 4×3 screw caps.
- 2 pre-installed screws for devices.
- Connector with a bayonet lock that connects on both sides.
- 6 combined inlets for pipes ∅ 20 and 25 mm.
- 4 ∅ 20 mm inlets.
- 2 ∅ 14 mm inlets.
- 1 inlet ∅ 20 mm at the base.

Tested according to DIN EN 60670-1, DIN EN 60670-22 and DIN 49073-1.

MKV-7. ROUND MOUNTING BOX WITH EXTRA SPACE UE 66 FOR BRICK WALLS

- Length: 61 mm
- Width: 66 mm
- Material: polypropylene / thermoplastic elastomer
- Fire resistance: 650 °C

MKV-8. ROUND MOUNTING BOX WITH ADDITIONAL SPACE UE 66-L FOR BRICK WALLS, WITH MEMBRANES

- Length: 61 mm
- Width: 66 mm
- Material: polypropylene / thermoplastic elastomer
- Fire resistance: 650 °C

MKV-9. ROUND MOUNTING BOX WITH EXTRA SPACE HE 74-L FOR HOLLOW WALLS

- Height: 154 mm
- Width: 71 mm
- Depth: 77 mm
- Material: polypropylene
- Fire resistance: 850 °C
